A drawing produced in AutoCAD using the Command Set. Illustration: Autodesk AutoCAD is widely used by architects, engineers, planners, and drafters. Its immediate competitors include FreeCAD, Google Sketchup, and MicroStation. AutoCAD is available in both a single-user and a multi-user version. AutoCAD Users are split into two categories. Sketchup, which has similar functionality, includes Sketchup Pro and Sketchup Free. Both versions are available for Windows, Linux, and macOS. AutoCAD has two versions: AutoCAD LT, which is free, and AutoCAD LT Pro, which costs around \$2,000 for a full license. AutoCAD LT has limited functionality. AutoCAD has a command set, which includes commands for drawing, managing files and palettes, and some drawing controls. History On 26 May 1930, the Munich Stammisels-Gleisdreieck-Bogenhausen-Airport-Bahn (Munich Main-Bahn station) opened. On the night of 1/2 October 2008, the station closed for renovation work and reopened on 5 March 2009 with the new naming "Munich International Airport". As a part of the renovation, parts of the station were built underground, including the area around the station building. A new station building was built to the east and south. Platforms 2 and 3 were lengthened and moved and new platforms 4 and 5 were built. The new platforms are located between the platforms of the previous station building. The new station building is also being used as the arrivals hall of the airport and is open to the public. Since the opening of the airport's two new terminal buildings in 2011, the station has been the terminus of line S 6 of the Munich U-Bahn, which runs from Platzl, west of the station, to Schöngarten. Trains running on the Munich-Viktoria station use platform 3, the middle one of the five new platforms. In the summer of 2010, this platform was also served by the underground city train, running between Munich's central station and Sendling. Since the summer of 2012, this line runs from Xinglongdong station to the airport. In the evening and at weekends, bus service No. 150 runs from the central station (the Hauptbahnhof) to the airport.
