Booking Online Form Maker Download

A simple to use form generator tool is a must for every website owner as it allows them to insert a booking form on their website. However, the method by which the form is captured and delivered to the customer can be different as many websites handle it in different ways. Some of the popular techniques include: For example, if you write the form code manually, you will have to copy the code to the clipboard from where it is pasted within the website. On the other hand, if you use an online form generator software, it will generate the form and automatically copy the code to your clipboard and when you paste it into your website, it will be automatically sent to your defined e-mail address. By using Booking Online Form Maker, you can easily create a hotel booking form or an online ticket booking form. The software is compatible with ASP, VBScript and PHP web development languages. However, for creating a simple form, you don't need to take too much efforts as Booking Online Form Maker will automatically generate the code for you. Booking Online Form Maker features: * Generates the code for a hotel booking form in the selected language. * Generates the code for online ticket booking form. * User-defined Form Name and Customer E-mail are the two important fields. * User-defined E-mail is an optional field. * Generates the code for instant confirmation e-mail as well as for the reservation system. * Generates the booking form within the user-defined HTML file. * Generates the standard HTML page (without any form) in case the option is not selected. * Generates the booking form link in the guest's browser. * Generates the code for the Booking Form Form having a specified CSS style. * Generates the code for the Booking Form Form having a specified HTML style. * Generates the code for the Booking Form Form form containing specified font. * Generates the code for the Booking Form Form containing specified background color. * Generates the code for the Booking Form Form containing specified border color. * Generates the code for the Booking Form Form being opened by specified link. * User can set the bookings options to include/exclude the booking form content for the guest. * Has a built-in full featured text editor. * User can also insert custom data fields into the form's fields. * Generates the code
