O que fiz até agora: Instalei o ruby-debug como a seguinte linha de comando: `gem install ruby-debug-ide -v '1.5.1'` Achei algumas coisas no google sobre o aruba e achei que bastaria instalar o `gem. gem install aruba` Porém no meu caso, após isso o aruba não pode ser instalado com esse erro. Chronic ethanol exposure alters NMDA receptor function in the nucleus accumbens. Previous work from this laboratory has demonstrated a reduction in the number of NMDA receptors in the nucleus accumbens of rats chronically exposed to ethanol, suggesting that NMDA receptors are decreased in this area in response to ethanol. In this study, the function of those receptors was examined by measuring the ability of (1) glutamate (10(-4) M), (2) NMDA (10(-4) M), and (3) glycine (10(-4) M) to induce increase in cyclic AMP accumulation in a cell-free preparation of the nucleus accumbens from rats chronically exposed to ethanol (24 days), compared with nonethanol-treated rats. The results showed that chronic ethanol exposure reduced the ability of glutamate to increase cyclic AMP levels (by 32% +/- 6.6%; n = 4; P < 0.05).

Q: Is it possible to pass a type argument as the TClass parameter of a method? I have the following TTDHooking class: TMyHooking = class public class procedure SetUp; class procedure TearDown(const ClassName: string; const Timeout: Integer); end; The SetUp procedure gets executed once at the beginning of a test, and the TearDown gets executed once after the test is finished. TearDown takes ClassName as a parameter and Timeout as a parameter. I am using the following class to declare my tests: TTestObject = class procedure DoSomething; end; The DoSomething method can't take a ClassName as a parameter, so I pass it as a type to TTestObject: class procedure TTestObject.DoSomething; begin ... end; class procedure TMyHooking.SetUp; begin ... end; class procedure T

Send or read feedback on your drawings right from the Command Line Interface (CLI), using the new Markup UI. No more need to reopen your drawings to see changes. Add feedback to your drawings with markups. Click on a drawing element to enter the markup editor, then add your feedback directly to the drawing. (video: 1:25 min.) Show markup assist: Markups assist with import and export of drawings, as well as show a message to remind you of them. New 2D dimensions: Dimensions that span more than one axis create new 2D objects. Add them to drawings as you create and edit dimensions, or as you export. Revised drawing sharing: Share your drawing with a link that opens a Dropbox folder. The folder automatically contains a Share button that shows the latest changes to your drawing.
